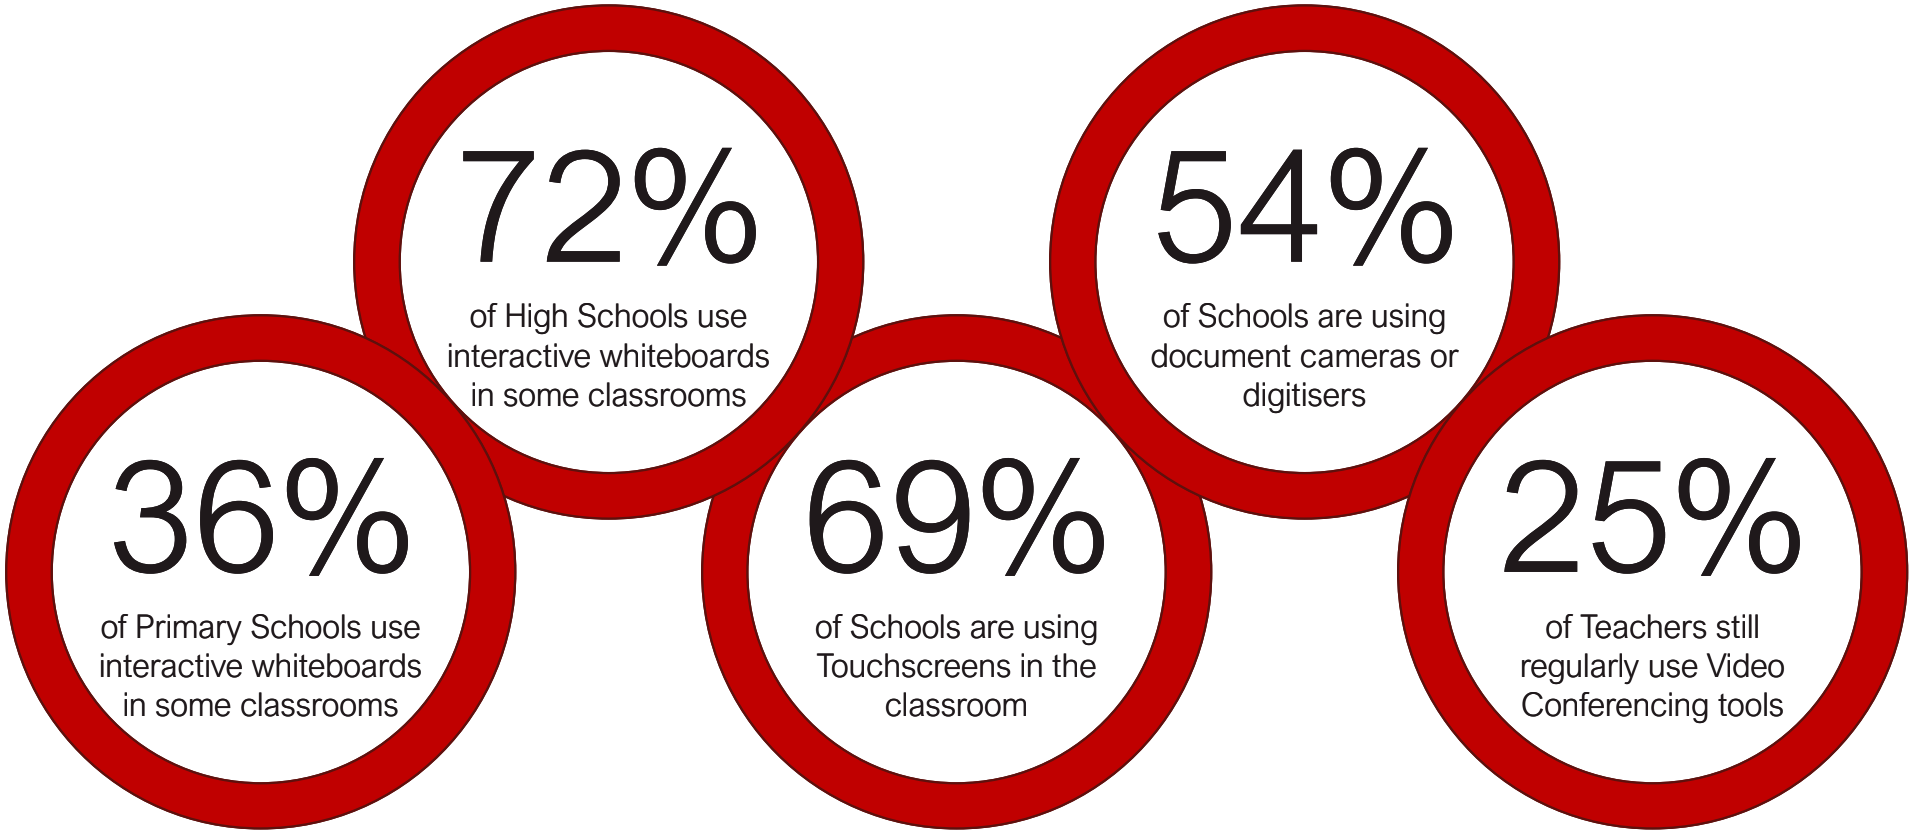
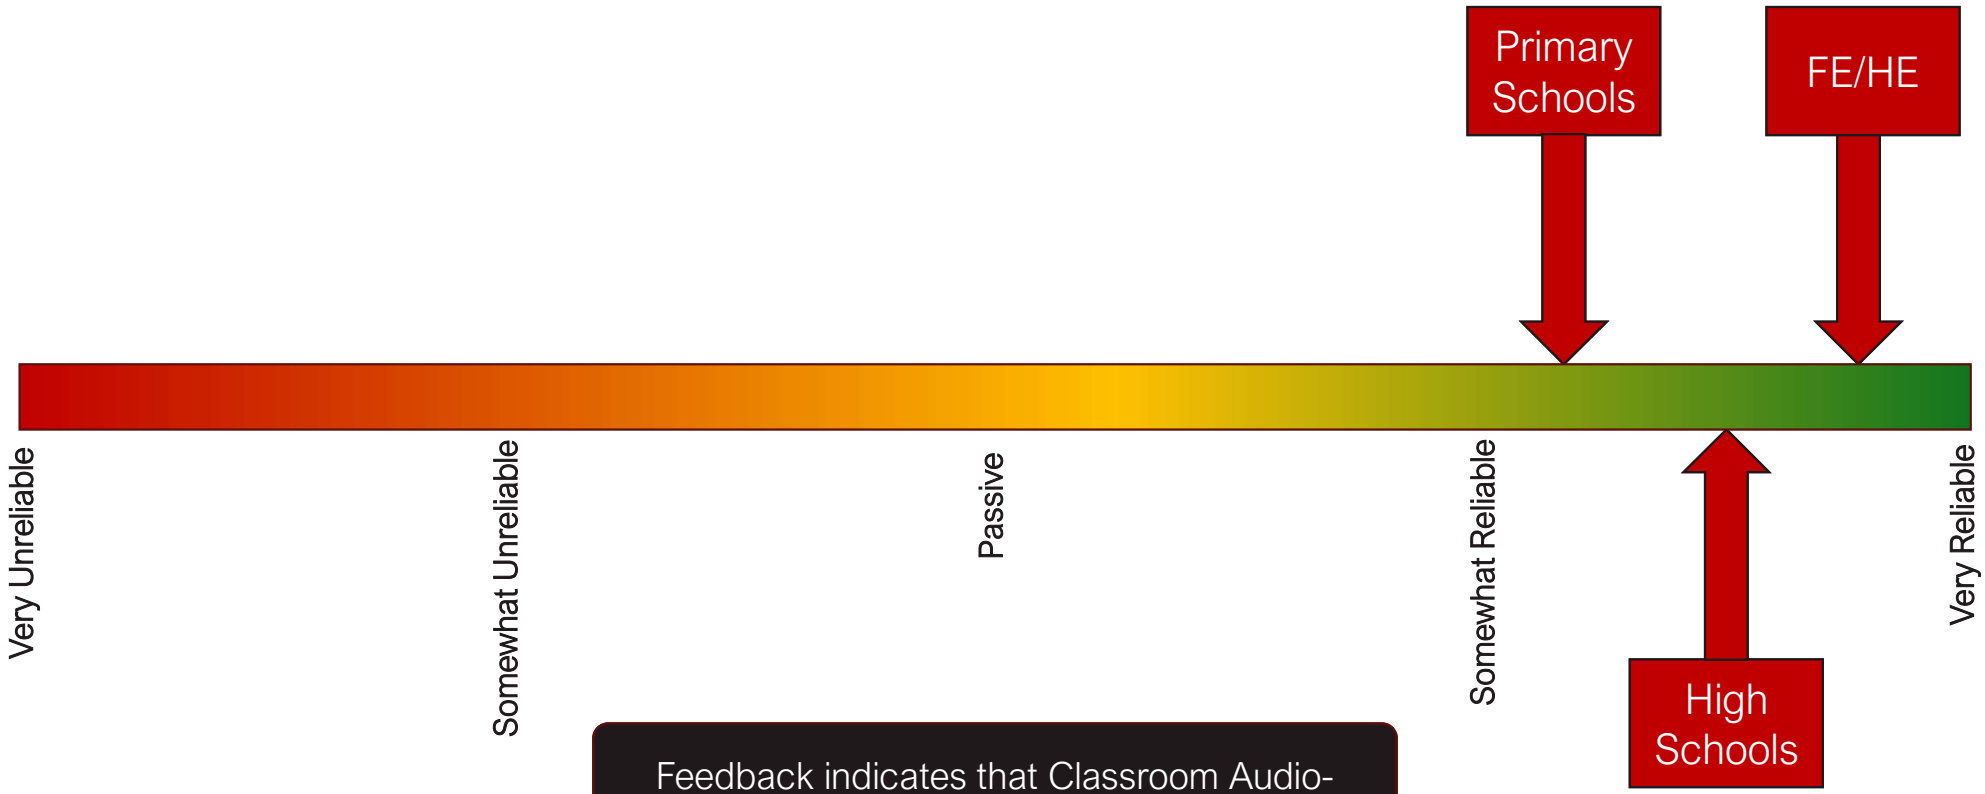
Solutions in Use



Reliability of AV in the Classroom

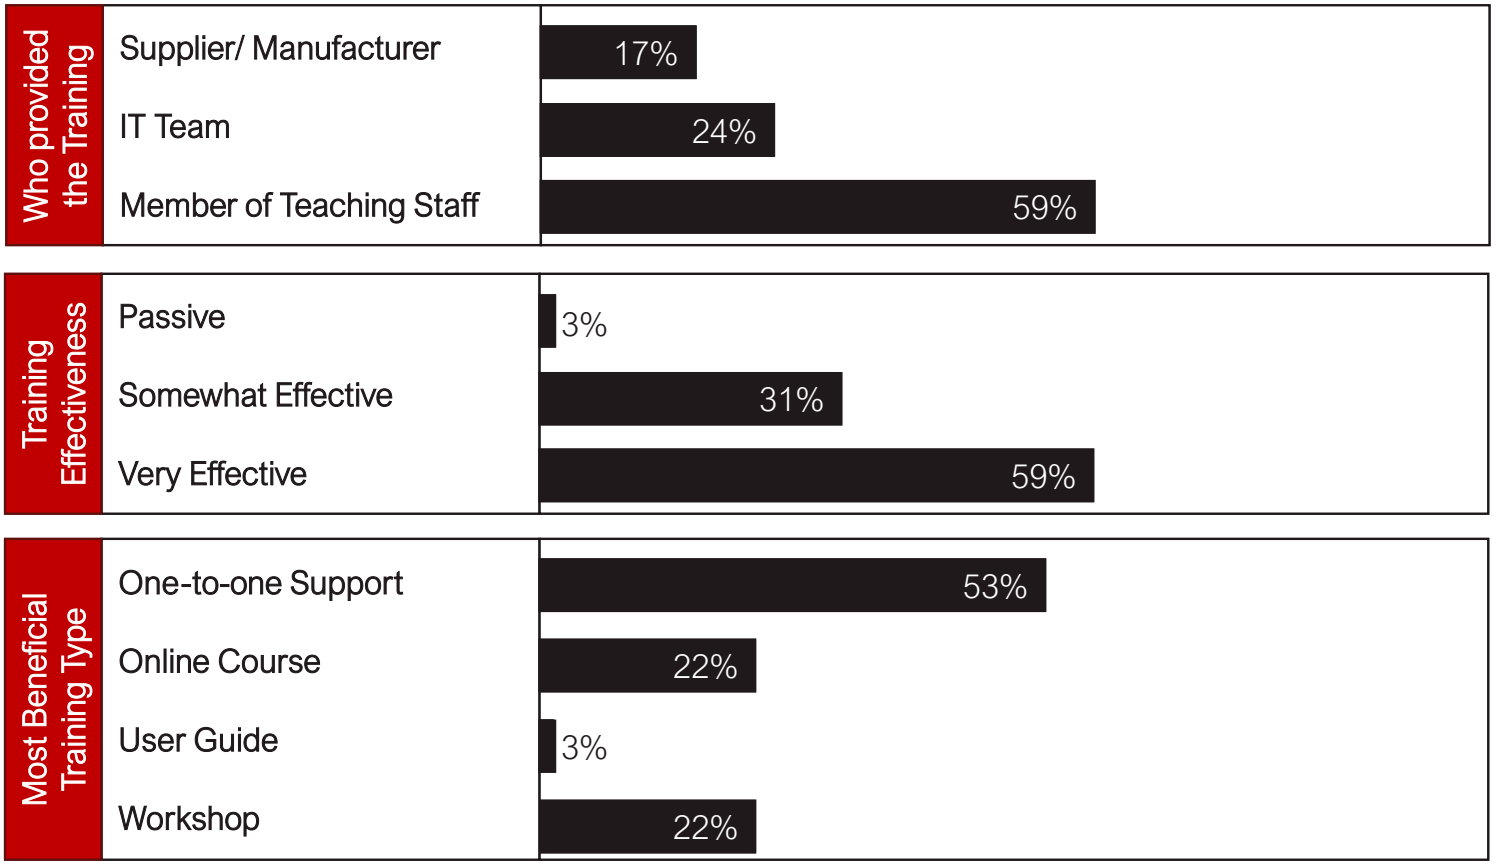


Feedback indicates that Classroom Audio-Visual Solutions were generally felt to be reliable across all school types

Audio Visual Training

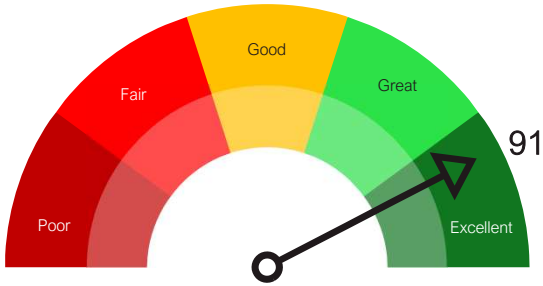
96%

of Teachers receive training on their classroom AV

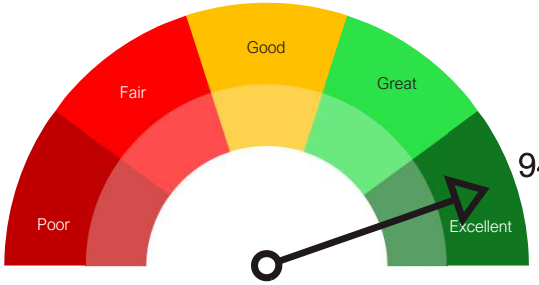


AV Support Satisfaction

Primary Schools



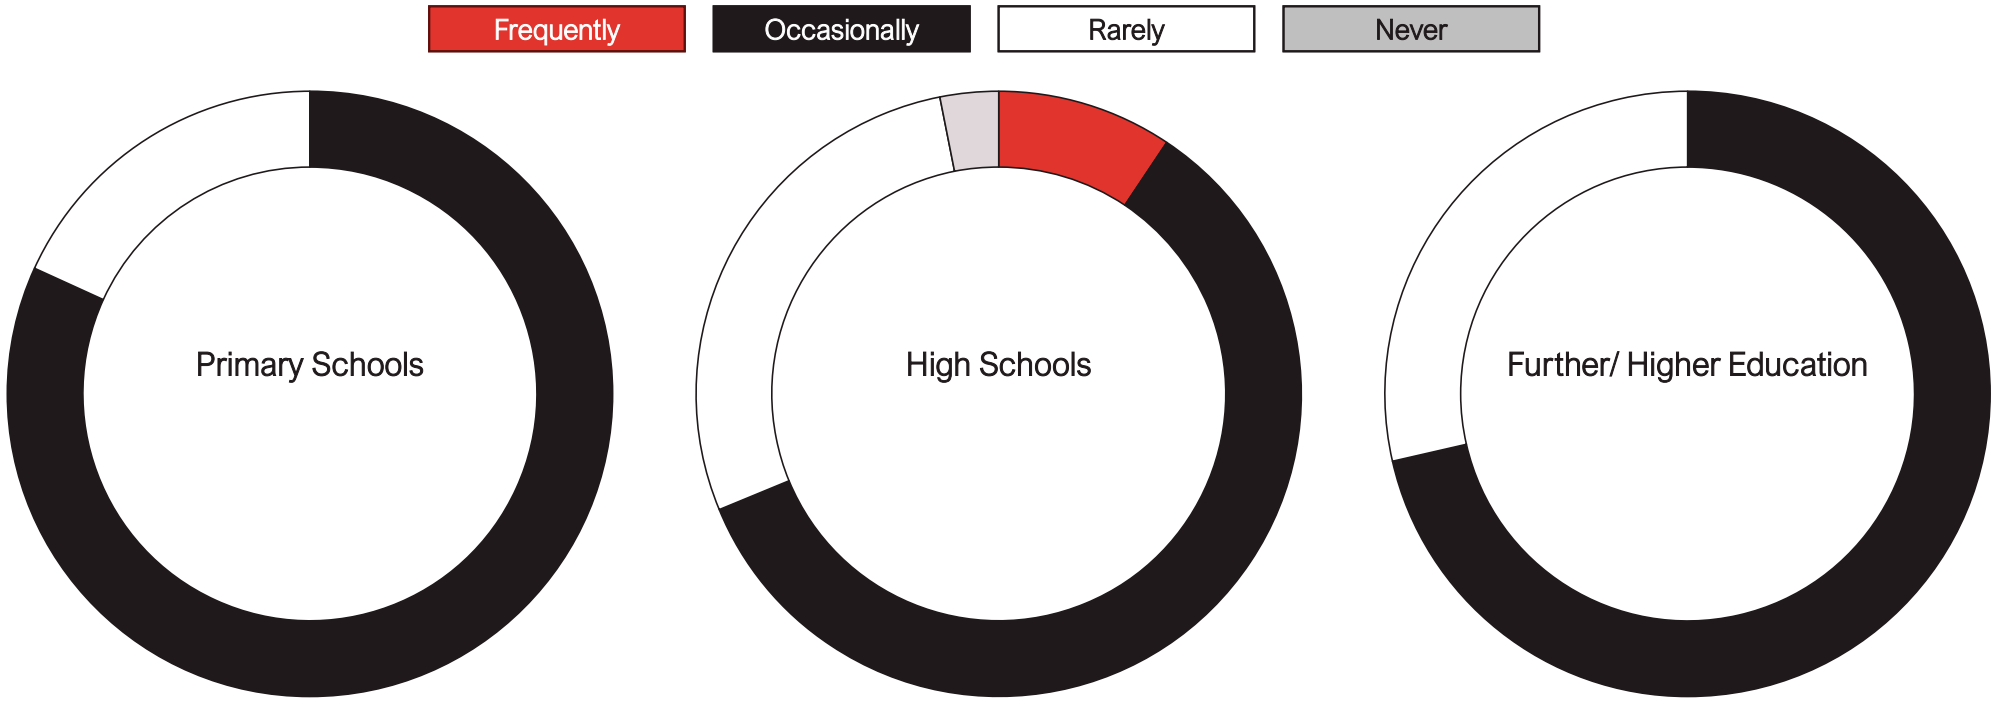
High Schools



Further/ Higher Education

Support satisfaction is generally high across all education settings, with Primary Schools slightly lower (likely due to the absence of full-time on-site Technicians)

Disruption to Teaching



Schools generally report only occasional disruption due to issues with Audio-Visual Solutions. In the event of a problem, the support provided is favourable

Common Issues

Over half of Schools reported that connectivity was an issue for them at 56% in Primary Schools and slightly lower in High Schools at 52%

44% of Primary Schools felt that the classroom Audio-Visual solution was too complex, this reduced to 19% in High Schools

42% of High Schools believed that slow computers connected to their Audio-Visual solution impeded them whilst this was lower in Primary Schools at 33%

29% of High Schools felt they suffered from dim projection in classrooms whilst this reduced to 11% in Primary Schools where there are generally less projectors

Top 5 Suggestions for Improvements

- Engagement with Teaching Staff on the selection of new classroom AV solutions
- Provision of further/ongoing training, e.g. interactive features and teacher-specific use cases
- Try to keep the solutions easy to use and consistent across a deportment or School
- Scheduled refresh plan for equipment
- Regular proactive maintenance for example the application of software updates on screens
